PROFILE

I'm a dedicated third-year student at the department of Computer Science, University of Cyprus. I'm enthusiastic and driven about my studies and I'm actively seeking opportunities to expand my knowledge to different branches within my field. Excited to contribute my skills and learn from the dynamic and evolving landscape of Computer Science.

At the moment, I am focused on the wide area of Artificial Intelligence, with a particular interest in Machine Learning and Neural Networks. I am keen to apply my skills to meaningful projects, while also practicing knowledge from new experiences and challenges.

EDUCATION

- **University of Cyprus**, Nicosia, Cyprus **09/2022 - Present**
Bachelor's degree in computer science
Currently on third year of studies
Current GPA: 7.95
- **Arch.Makariou III Lyceum** , Dasoupoli
Graduated with GPA : 18.78

WORK EXPERIENCE

Intern Research Engineer **01/2024 - 09/2024**
KIOS Center of Excellence, Nicosia, Cyprus

- Designed and developed QGIS (Quantum Geographic information System) plugins using mainly Python programming language and QtDesigner for user interface.
- Repaired, designed and modified different applications in Python.
- Contributor for the Oceanos Digital Twin (OceanosDT). An evolutionary project for the water models of the Water Board of Limassol and Larnaca (WBL - LWB) for monitoring, calibrating models as well as running specialized genetic algorithms and simulations for their needs.
- Lead contributor for the WBLSampling web app using the Django Python framework. A project specialized in monitoring, adding and editing chlorine and other substance measurements for the Water Board of Limassol (WBL). I utilized various technologies, including jQuery for organizing data retrieved from database queries, and Leaflet JavaScript library for developing interactive maps to manage geospatial data stored in a Postgres database.

Barista **12/2022 – 08/2023**
Caffe Nero Dali , Nicosia, Cyprus

- Coffee preparation, customer service, cash handling, point of sale (POS) system, cleaning and sanitation, team collaboration.

SKILLS AND EXPERIENCE

- Analytical and problem-solving skills developed by coursework.
- Effective communication and team collaboration skills and tools (GitHub).
- Experience with project management and ability to organize and complete tasks efficiently. Familiar with Agile methodologies and tools such as Kanban Flow for task and project management.

TECHNICAL

- Web Development:
 - Frameworks: Proficiency in Django (Python) and Laravel (PHP) for building dynamic, scalable web applications.
 - Front-end: Proficiency with HTML, CSS, and JavaScript (including jQuery, Leaflet and React for interactive UIs).
 - Back-end: Solid experience with Django ORM and Laravel Eloquent for database management, including PostgreSQL, MySQL, and SQLite.
 - Deployment: Familiar with deploying web applications using Docker for containerization.
- Game Development:
 - Frameworks: Familiar with LibGDX used to create a personal project game, developed on Android Studio Integrated Development Environment (IDE).
- Database Development:
 - Proficient in designing relational database schemas using SQL Server, MySQL, and PostgreSQL.
 - Familiar with the full design process, including requirements analysis, ER diagrams, relational schemas, and using DDL/DML SQL.
- Algorithms:
 - Good knowledge of Data Structures and Algorithms. Implementation of algorithms using Java and C programming languages.
 - Familiar with machine learning algorithms for tasks such as classification, clustering and linear regression through coursework and projects.

AWARDS/RECOGNITIONS

- **1st Place of Team Project for Databases Course, University of Cyprus** **12/2024**
